DoranDoran : About the Service

"Your AI Korean chatbot mate"
learn language and culture the
natural, relationship-based way.

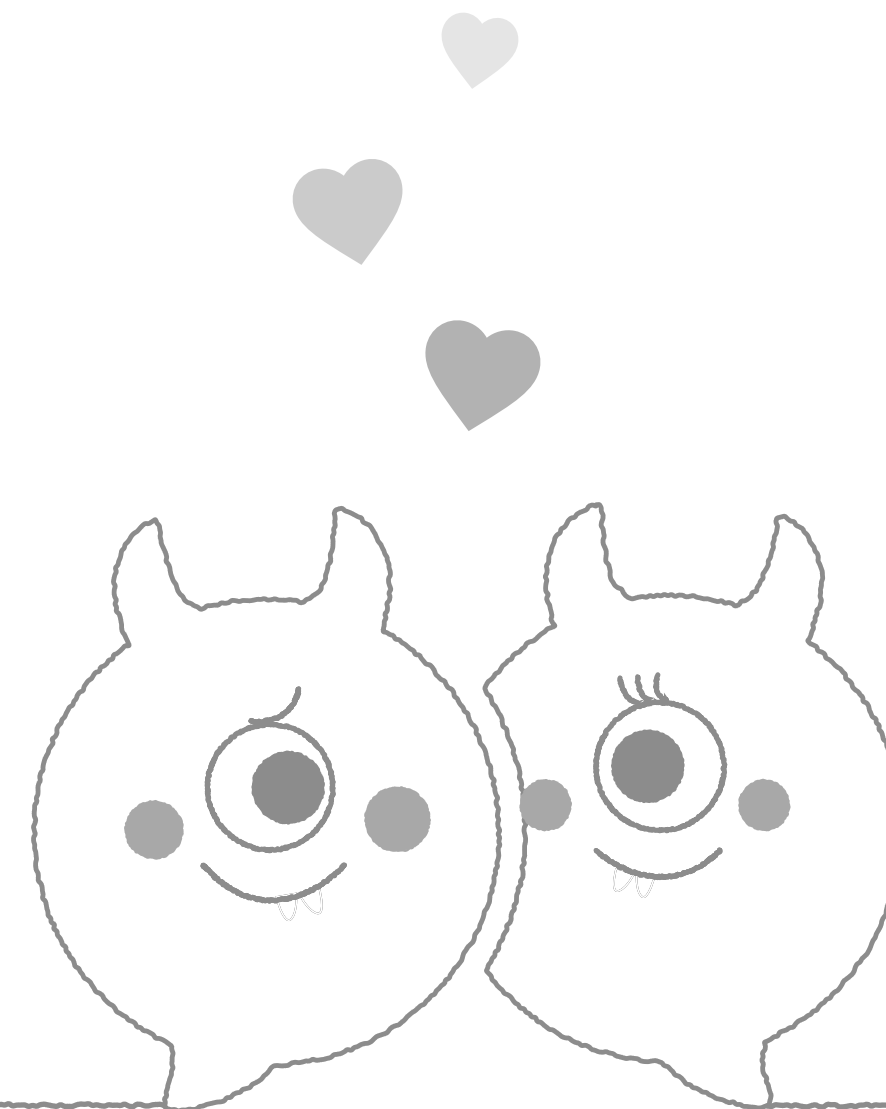

Overview

What if AI could understand your level of **closeness**?

In Korean, the way you speak changes depending on how close you are to the listener.
Even the same sentence can sound awkward if used with the wrong level of closeness.

DoranDoran analyzes the relationship and situation in each chat,
and **suggests natural expressions that match your level of closeness**.
It helps you go beyond memorizing grammar and learn the true rhythm of conversation.

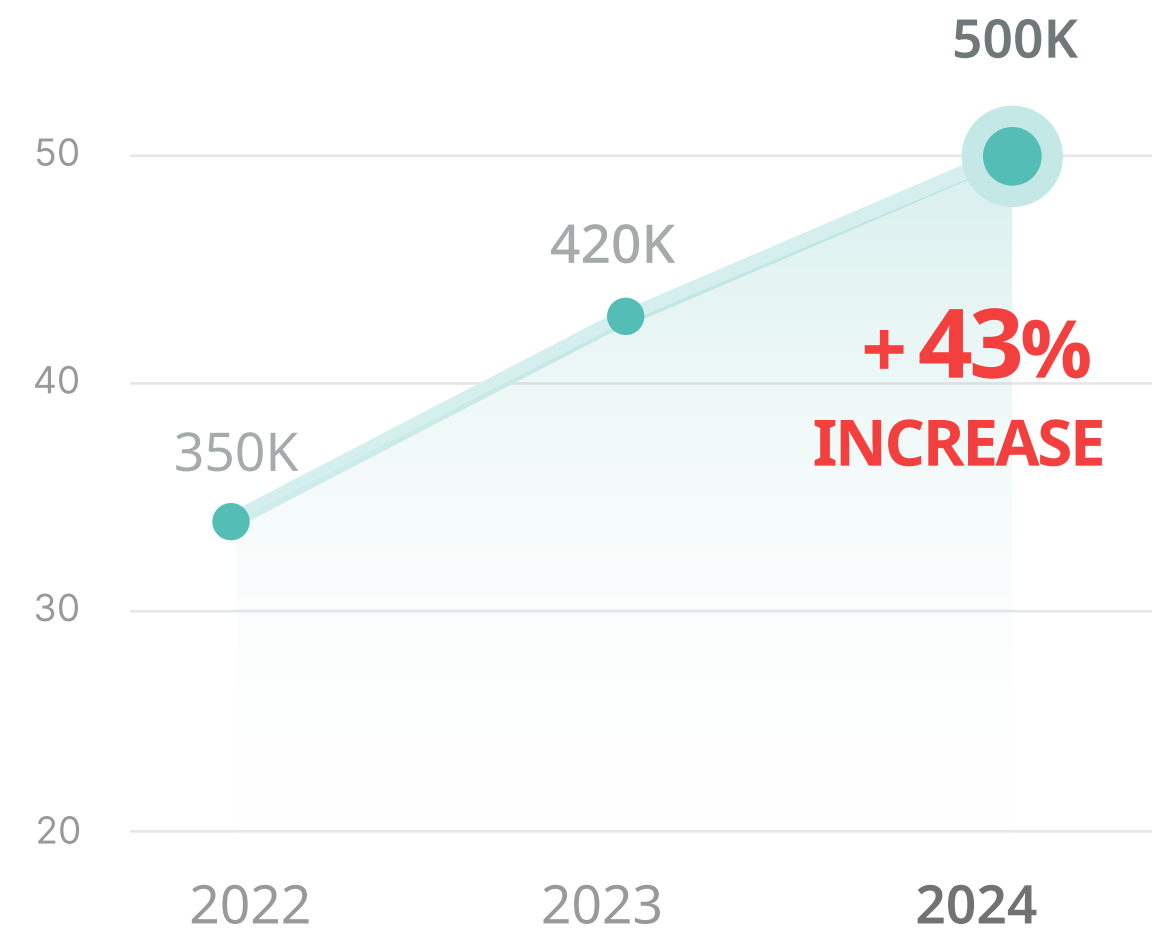

Background

More learners than ever — yet still struggling to “sound natural”

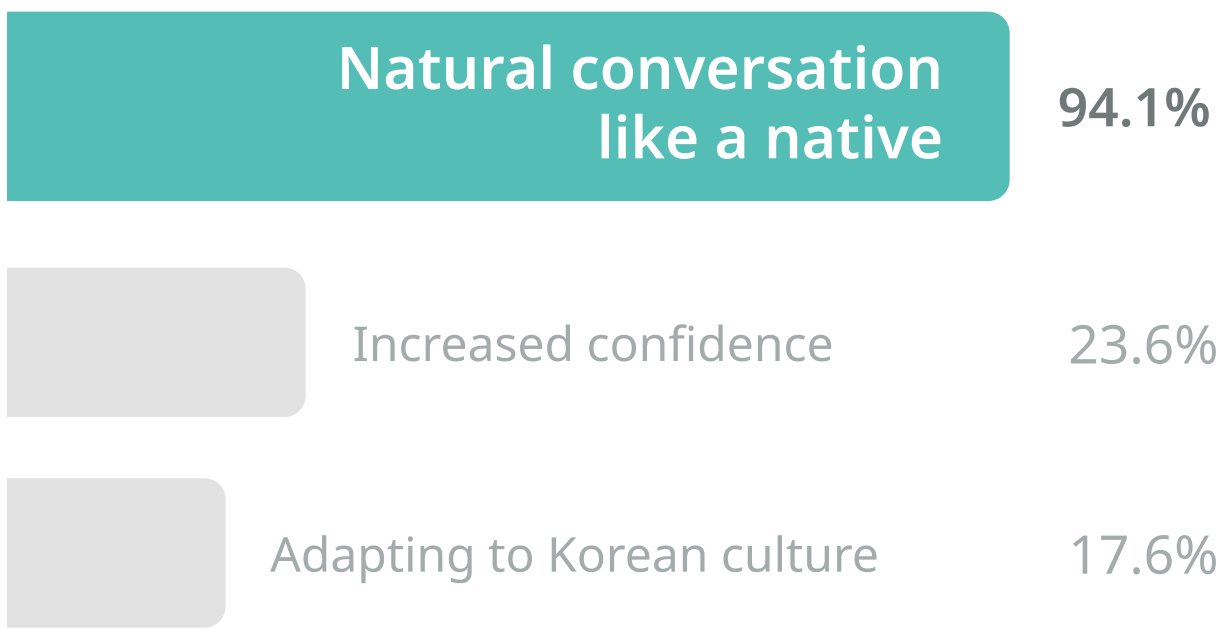

While the number of Korean learners keeps rising worldwide, many still find it difficult to speak naturally in real conversations. DoranDoran bridges this gap through context-based AI conversation learning.

Growing global demand for Korean language learning

Increase in number of TOPIK test takers (10,000 people) [Korea Education Newspaper]

What Learners Want to Achieve through Language Learning

94% NATURAL CONVERSATION NEEDS

Survey on Korean language learning service usage and demand for 20 foreigners

Intermediate learners’ real-life conversation difficulties

“Ever had a hard time knowing how polite to sound when texting or talking in Korean?”

- often_41.2%
- sometimes_29.4%
- Almost none 29.4%

ABOUT 70% OF RESPONDENT EXPERIENCED DIFFICULTIES WITH FORMALITY

Survey on Korean language learning service usage and demand for 20 foreigners

Market Research

A unique feature unseen in other services

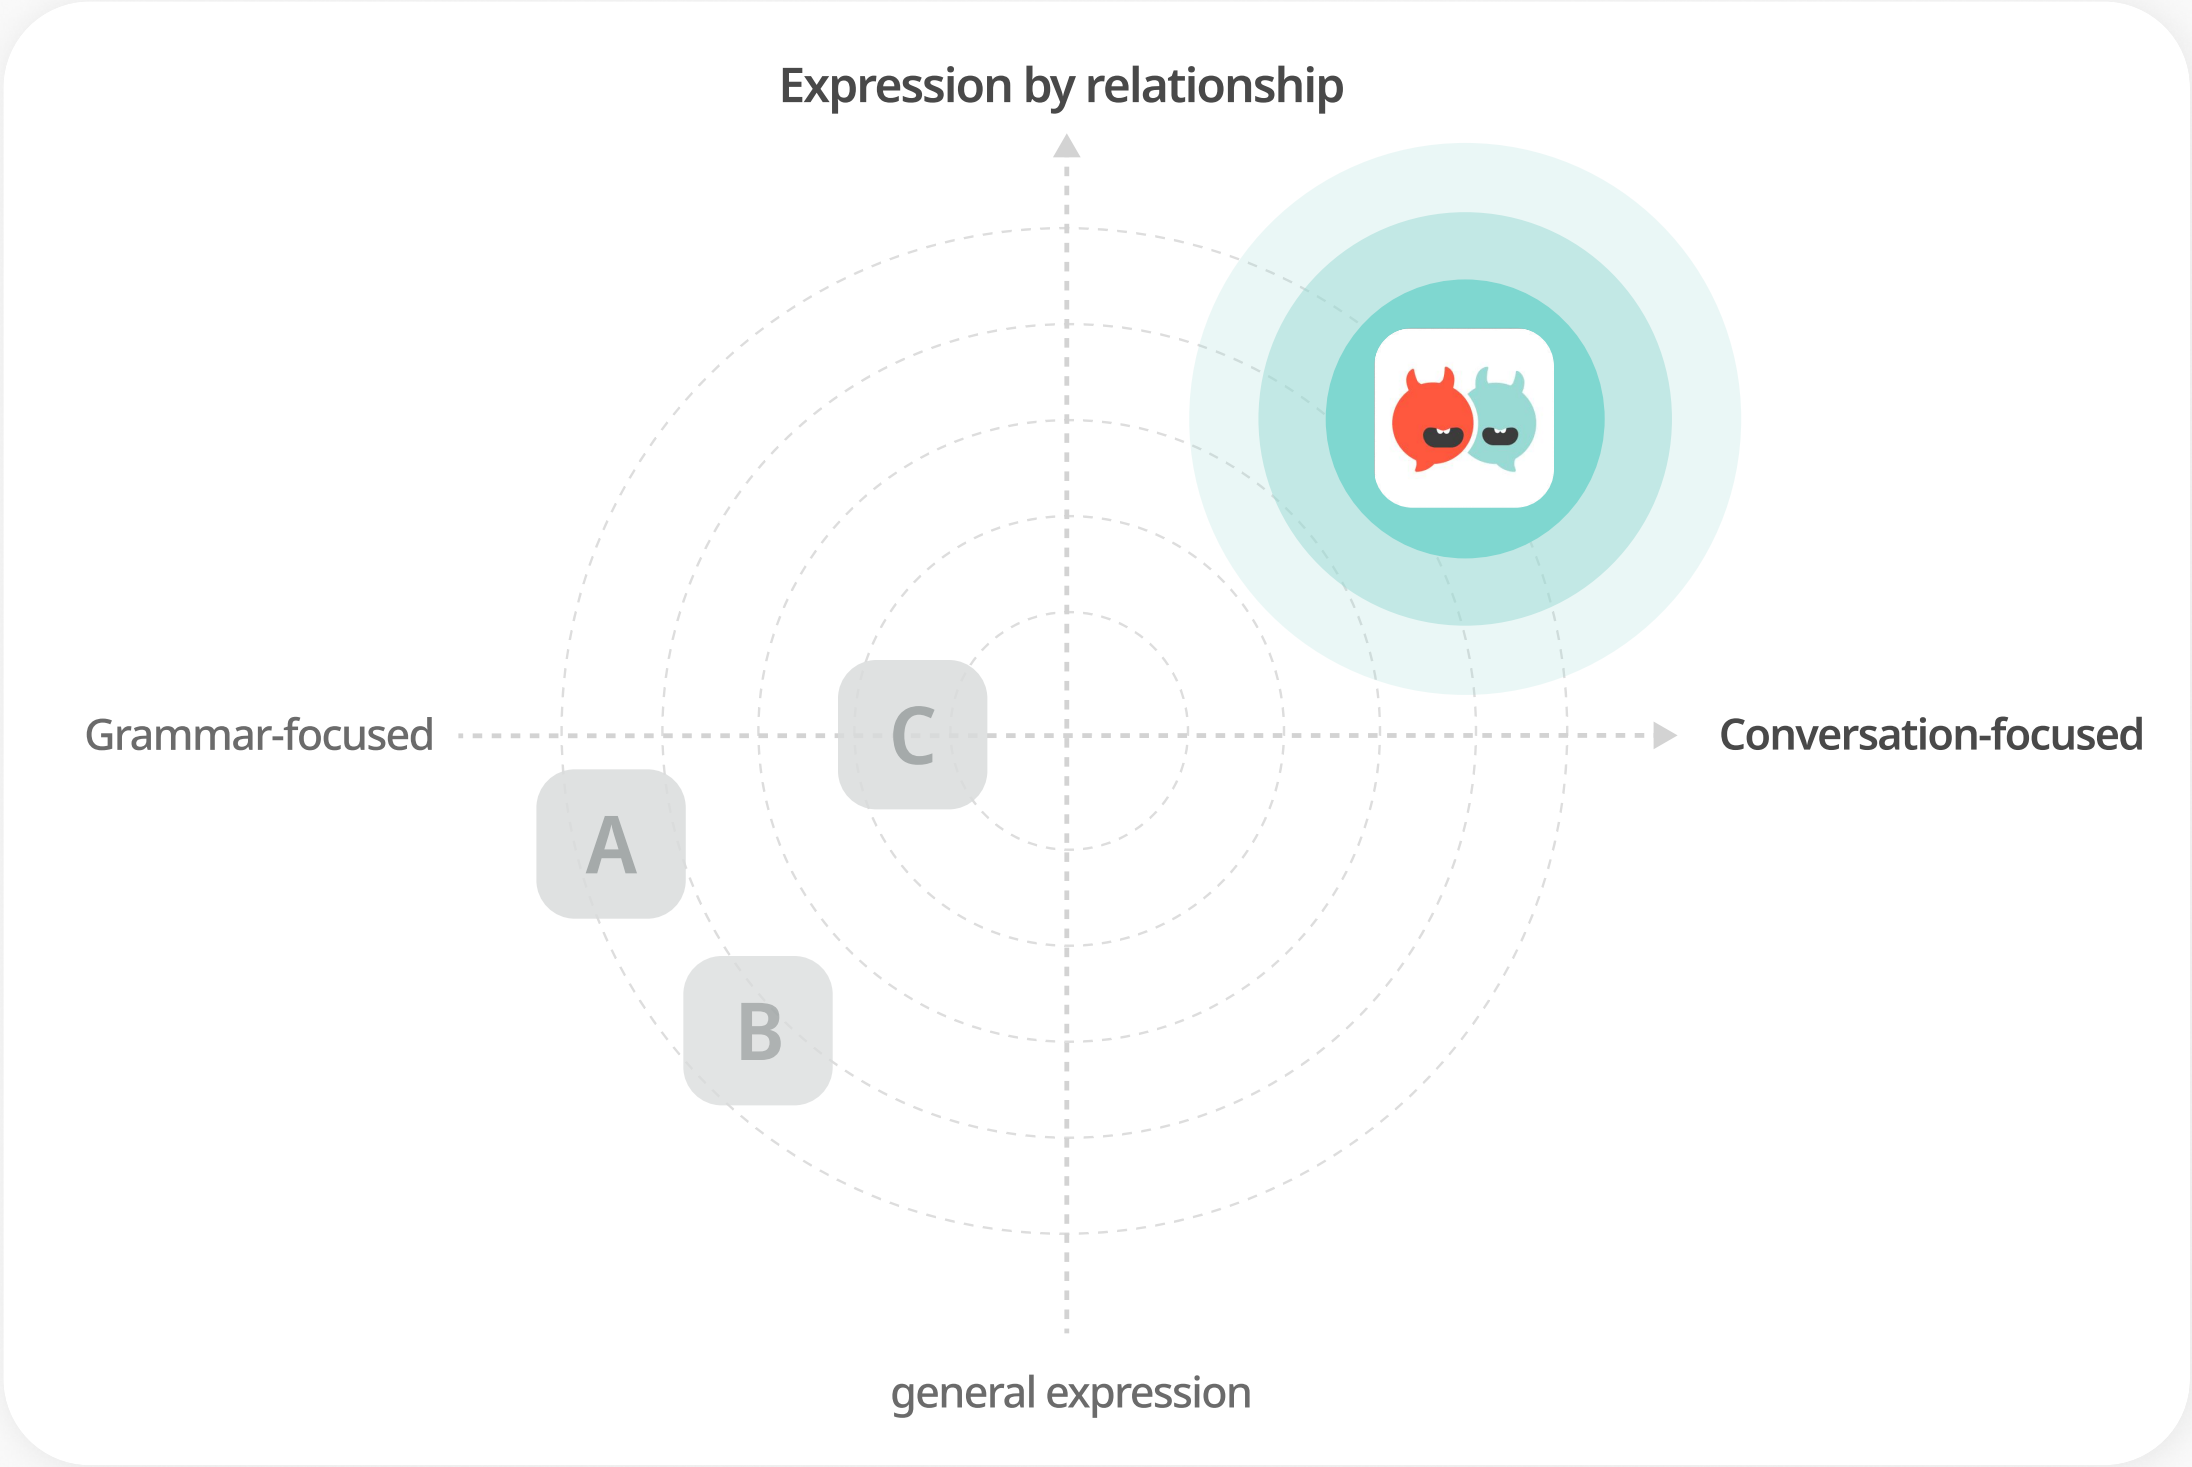

— context-based conversation & tone adjustment

Most Korean learning platforms focus on grammar or fixed phrases.
DoranDoran offers realistic chat-based learning that adapts to each relationship and situation with contextual feedback.

Competitive service comparison table

	Doran Doran	A-app	B-app	C-app
target group	Intermediate or above	Beginner to Intermediate	various	Business, employment preparation
Context-based conversations	Friends, bosses, lovers, etc.	Words and grammar only	None	Business only
Correction by intimacy	Categorized into 2 stages	None	None	Formal letters only
AI real-time correction	Context + Nuance	Grammar only	None	business focused
learning continuity	Storage + Review	Gamification	None	study notes

Solution

DoranDoran helps users learn to speak naturally through real conversations.

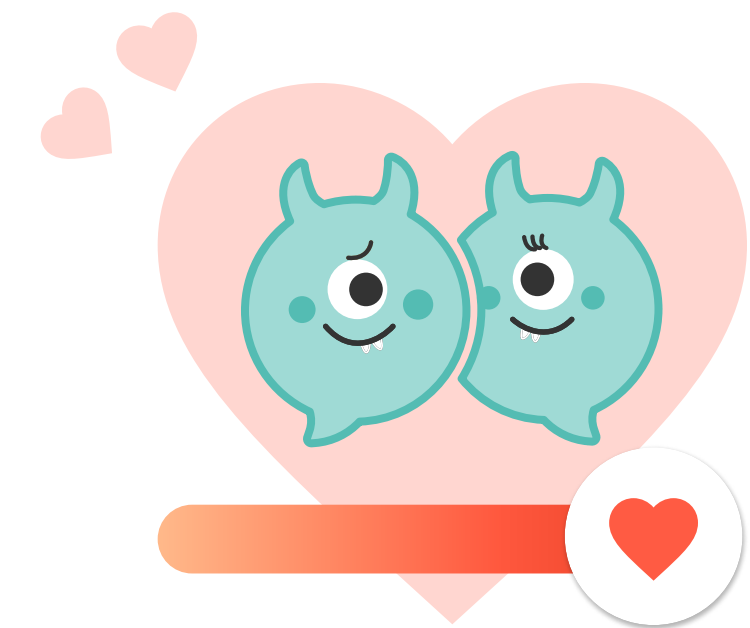

01. Context-Based Expression Learning

Provides customized chat rooms for various situations — from work communication to friendly meetups and romantic conversations.

02. Intimacy Slider

Divides relationship distance into three levels, allowing users to practice natural expressions that match the level of closeness.

03. AI Coaching

Refines sentences in real time according to context and relationship, and explains difficult words in an easy way.

04. Corrected expression archive

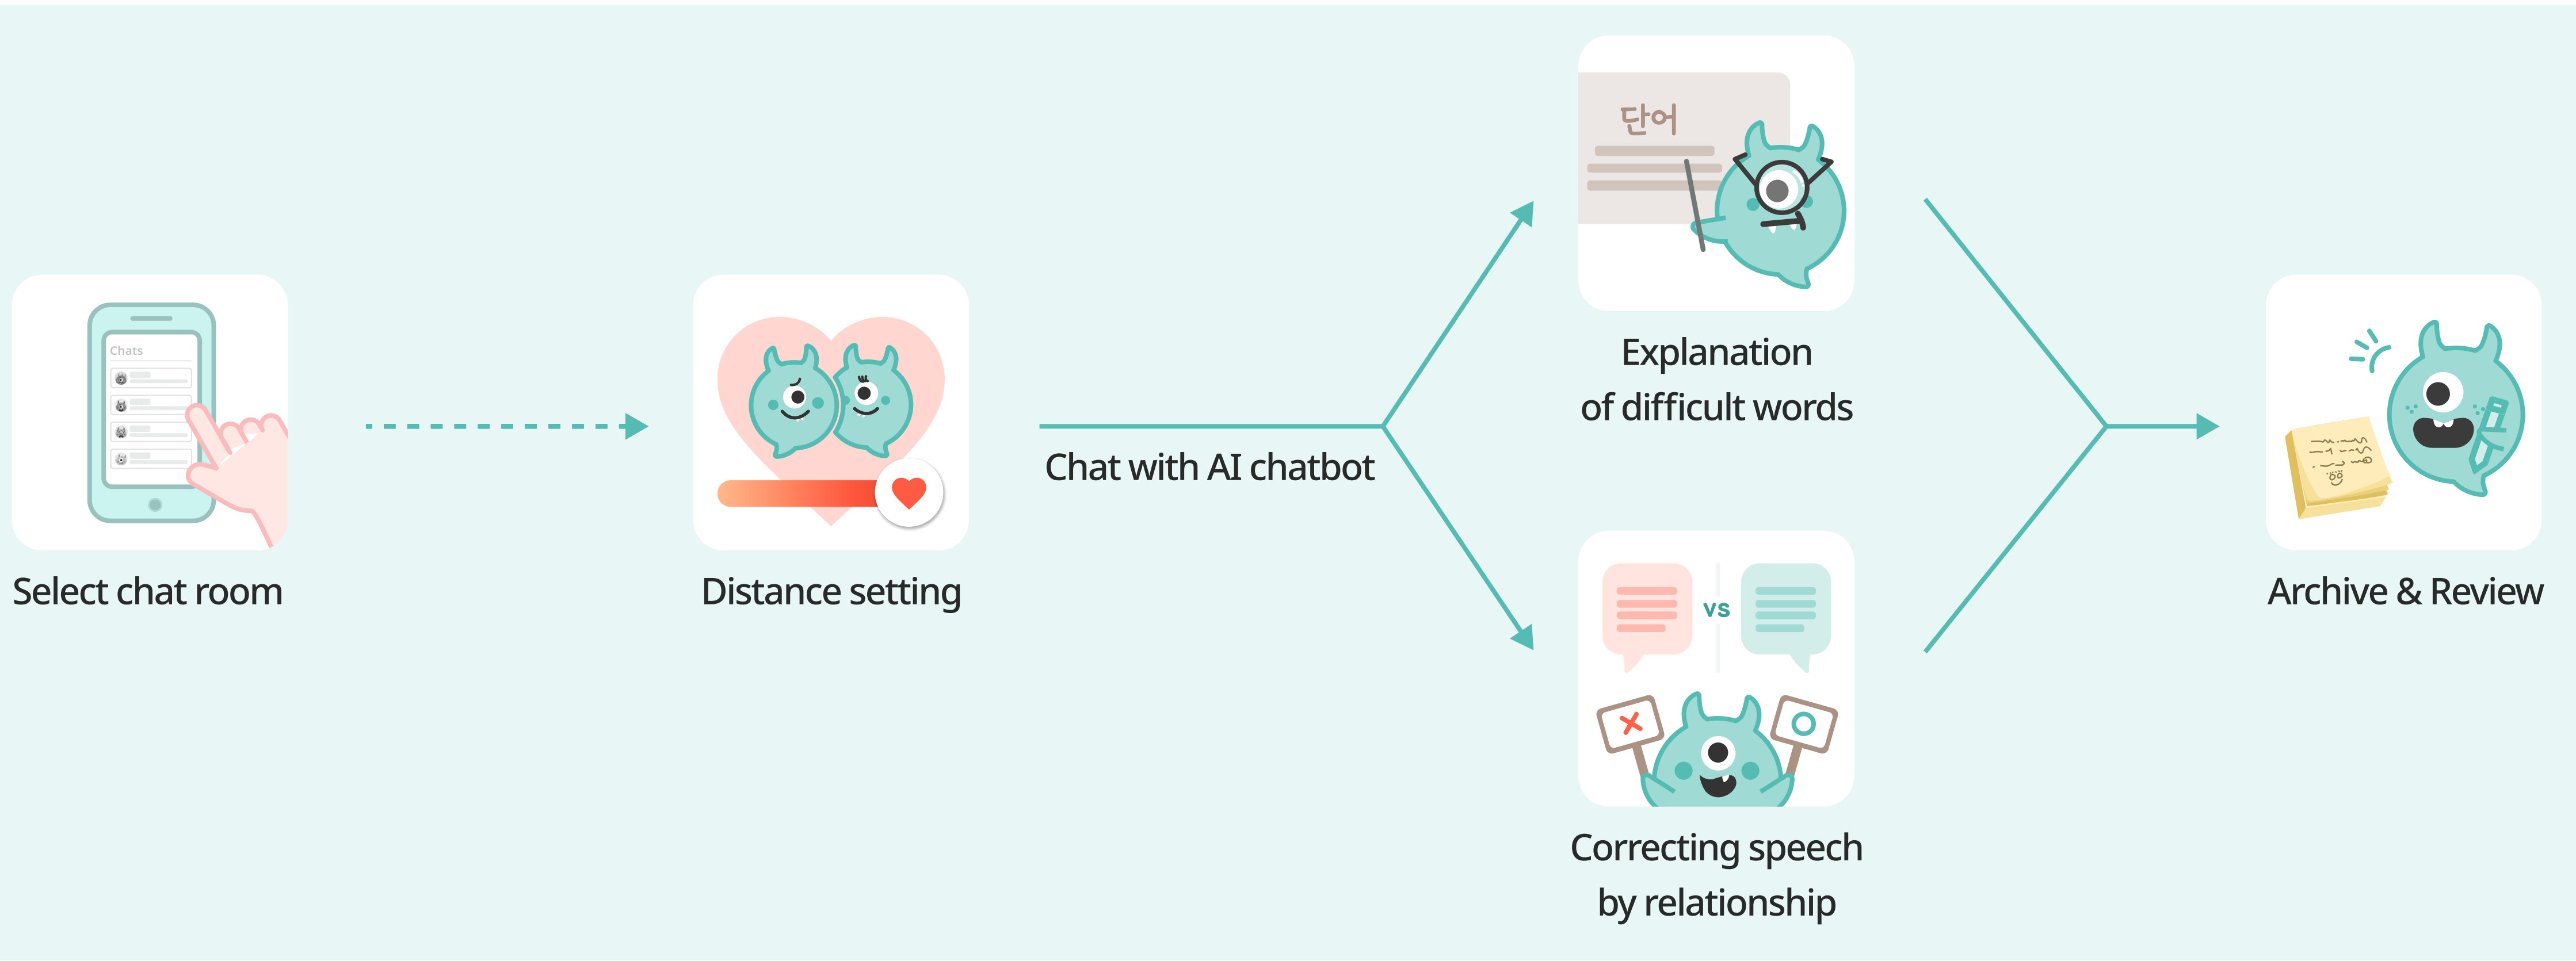

Saves corrected expressions and word explanations, enabling continuous learning through easy review.

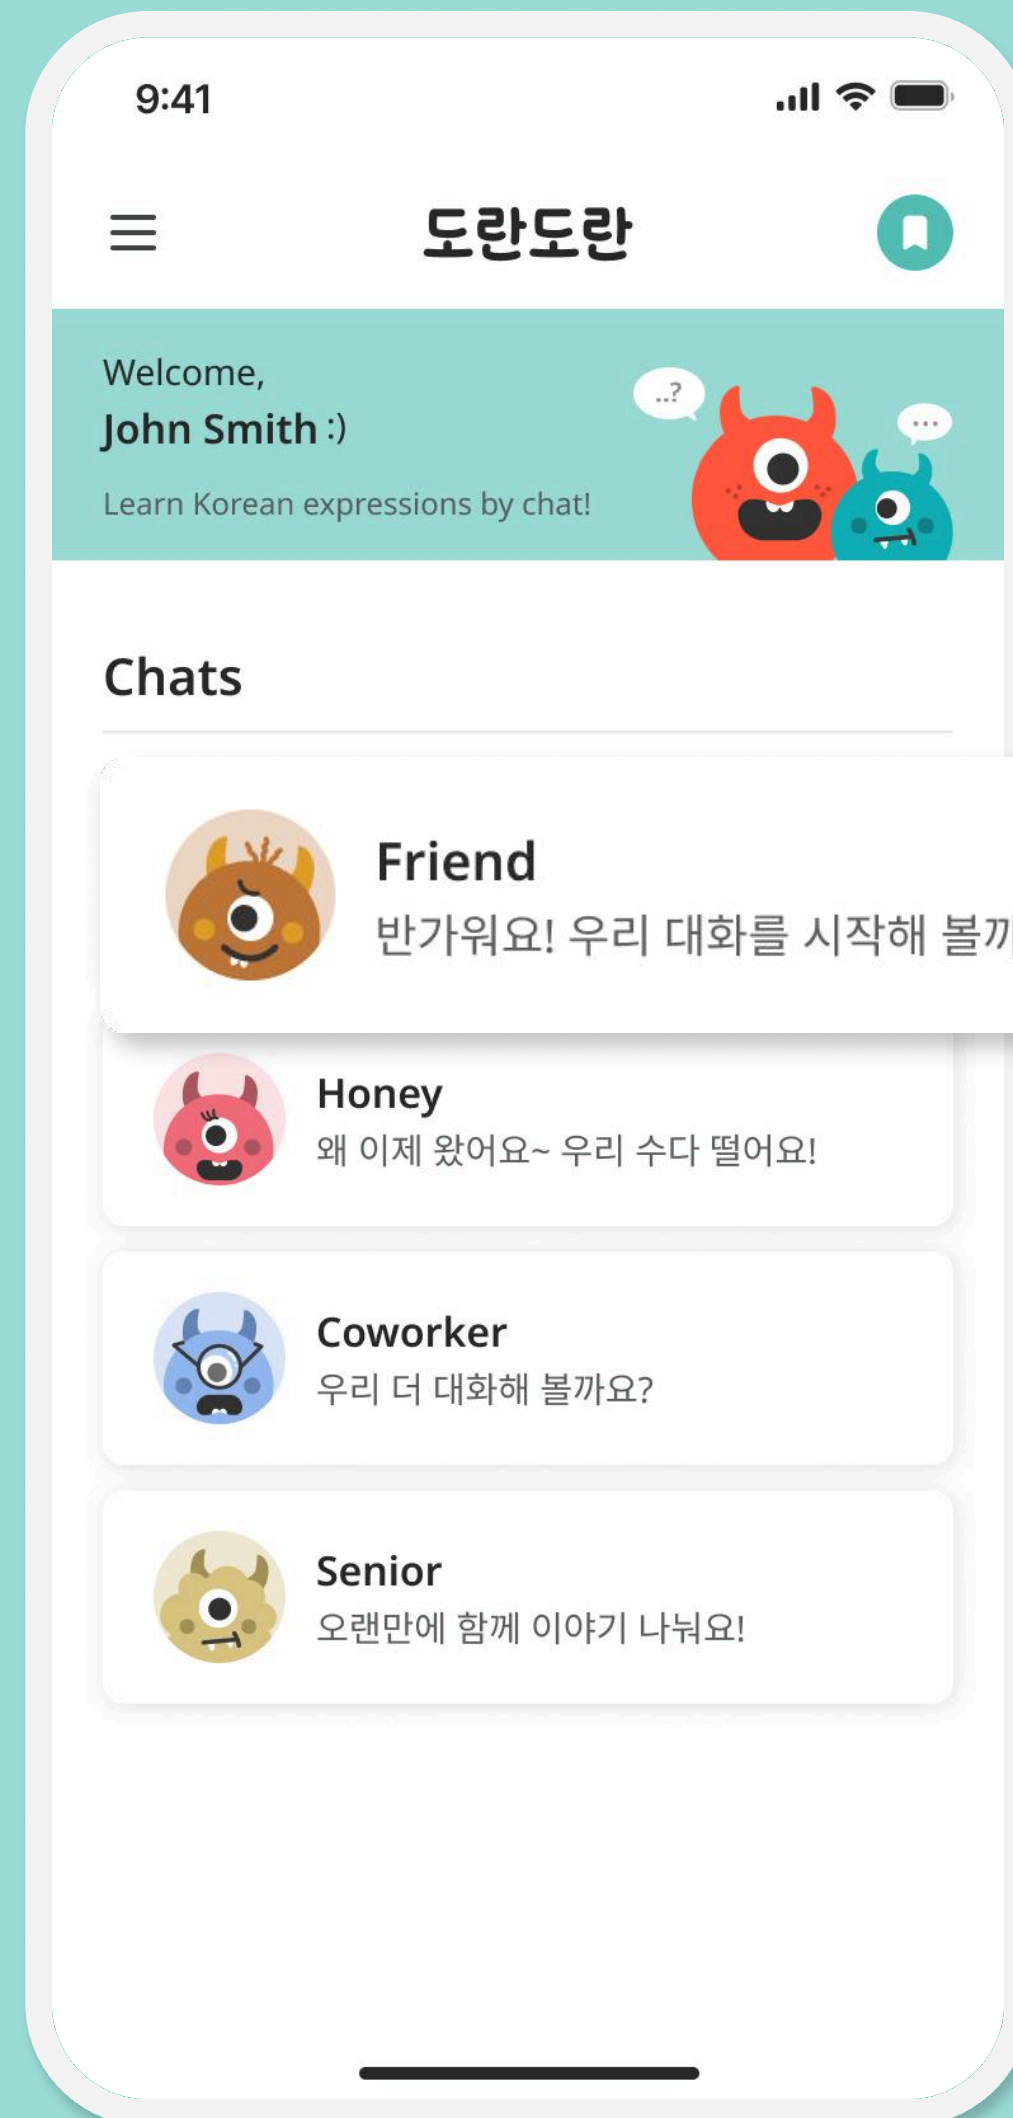

User Flow

Learn like you're chatting with a friend.

Based on testing with 20 Korean language learners, we designed a user flow where expressions are learned through chatbot conversations, corrected in real time, and stored for later review — helping users naturally improve tone and formality by context.

Main Screen

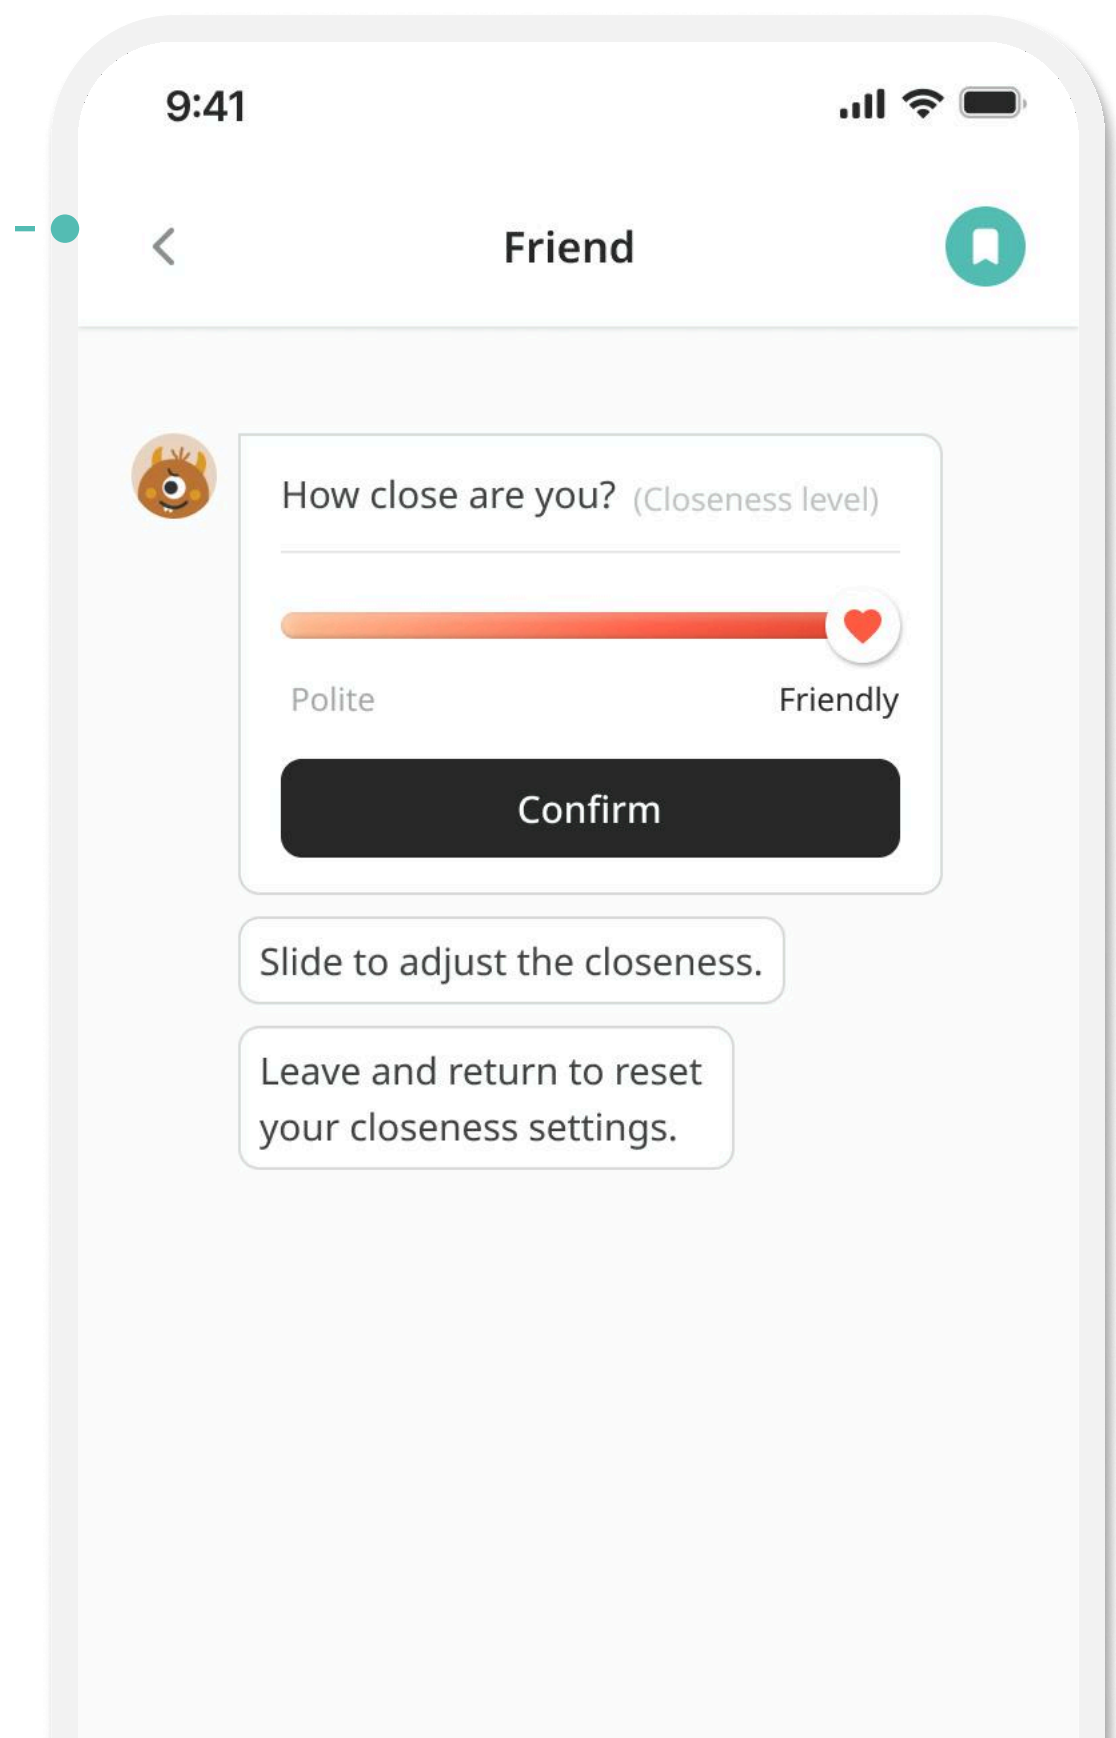

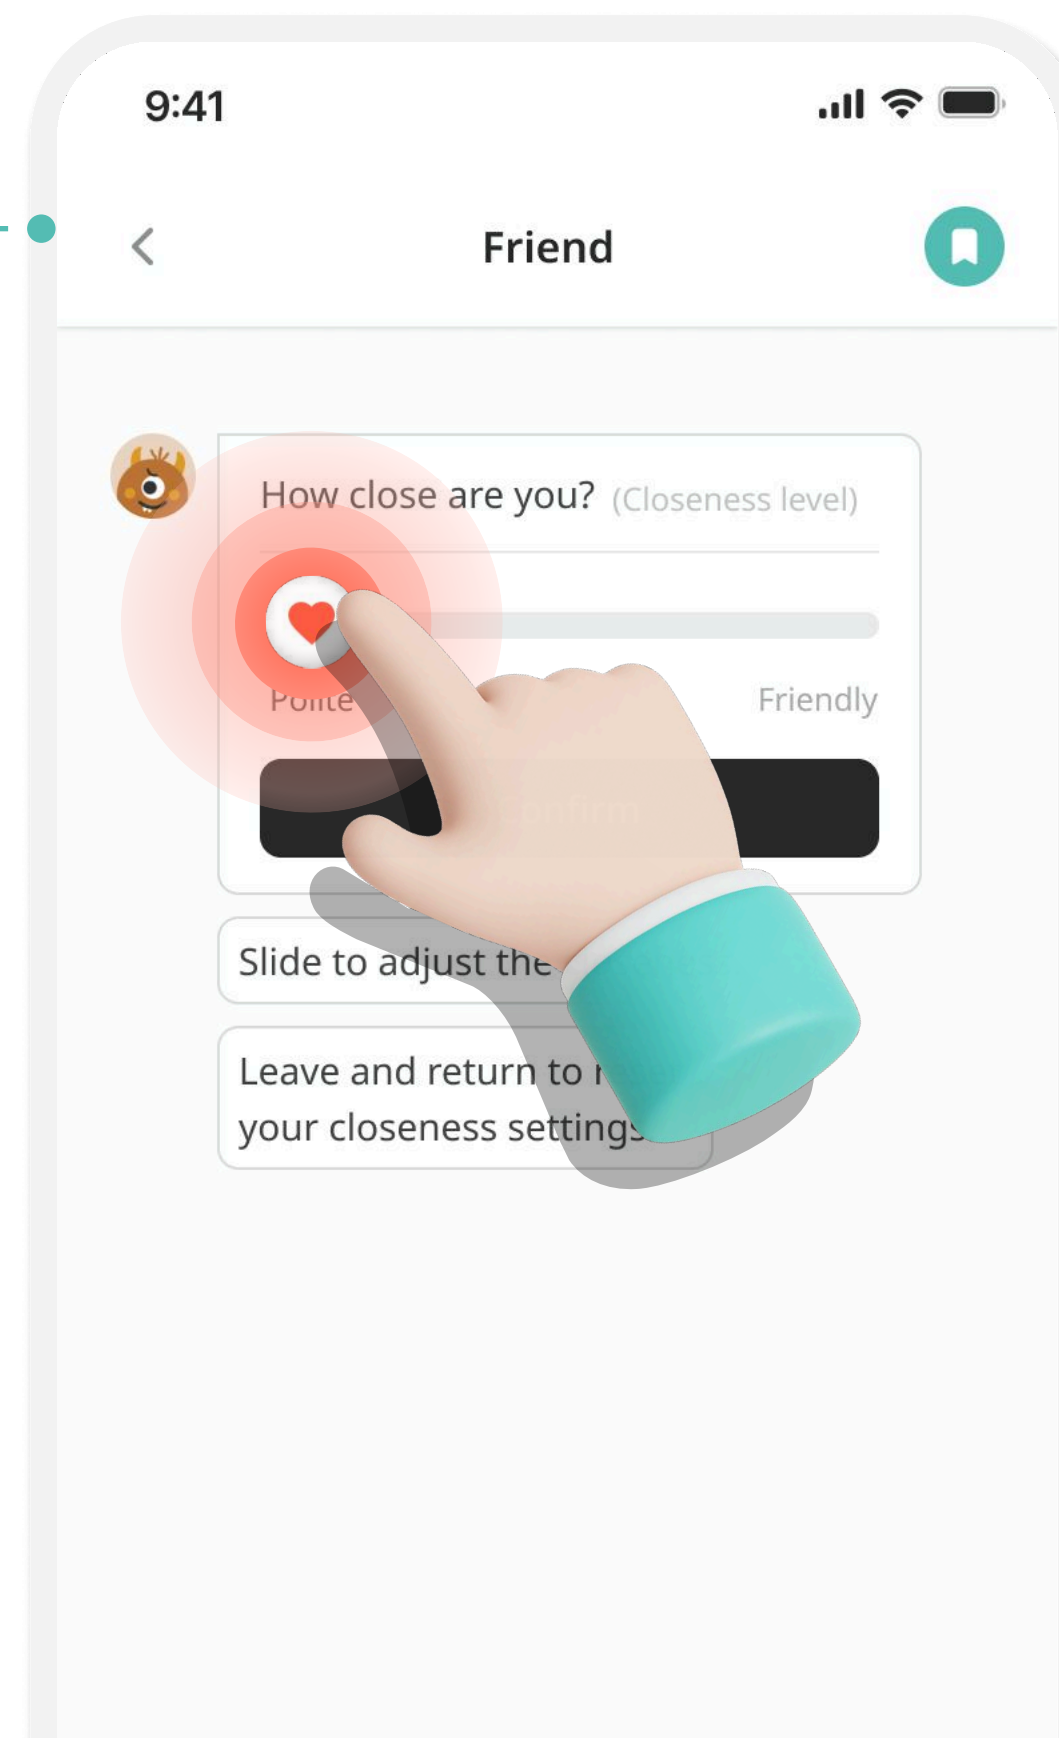

STEP 1 Main Screen & Closeness Setting

How close are you to the person you're talking to?

Select a chatroom and set your closeness level to start a relationship-based conversation.

Closeness Setting

STEP 2 Chat screen & AI customized correction

Chat and learn expressions that suit your level of intimacy.

The chatbot corrects your tone and expressions based on your level of closeness and context, suggesting more natural phrases.

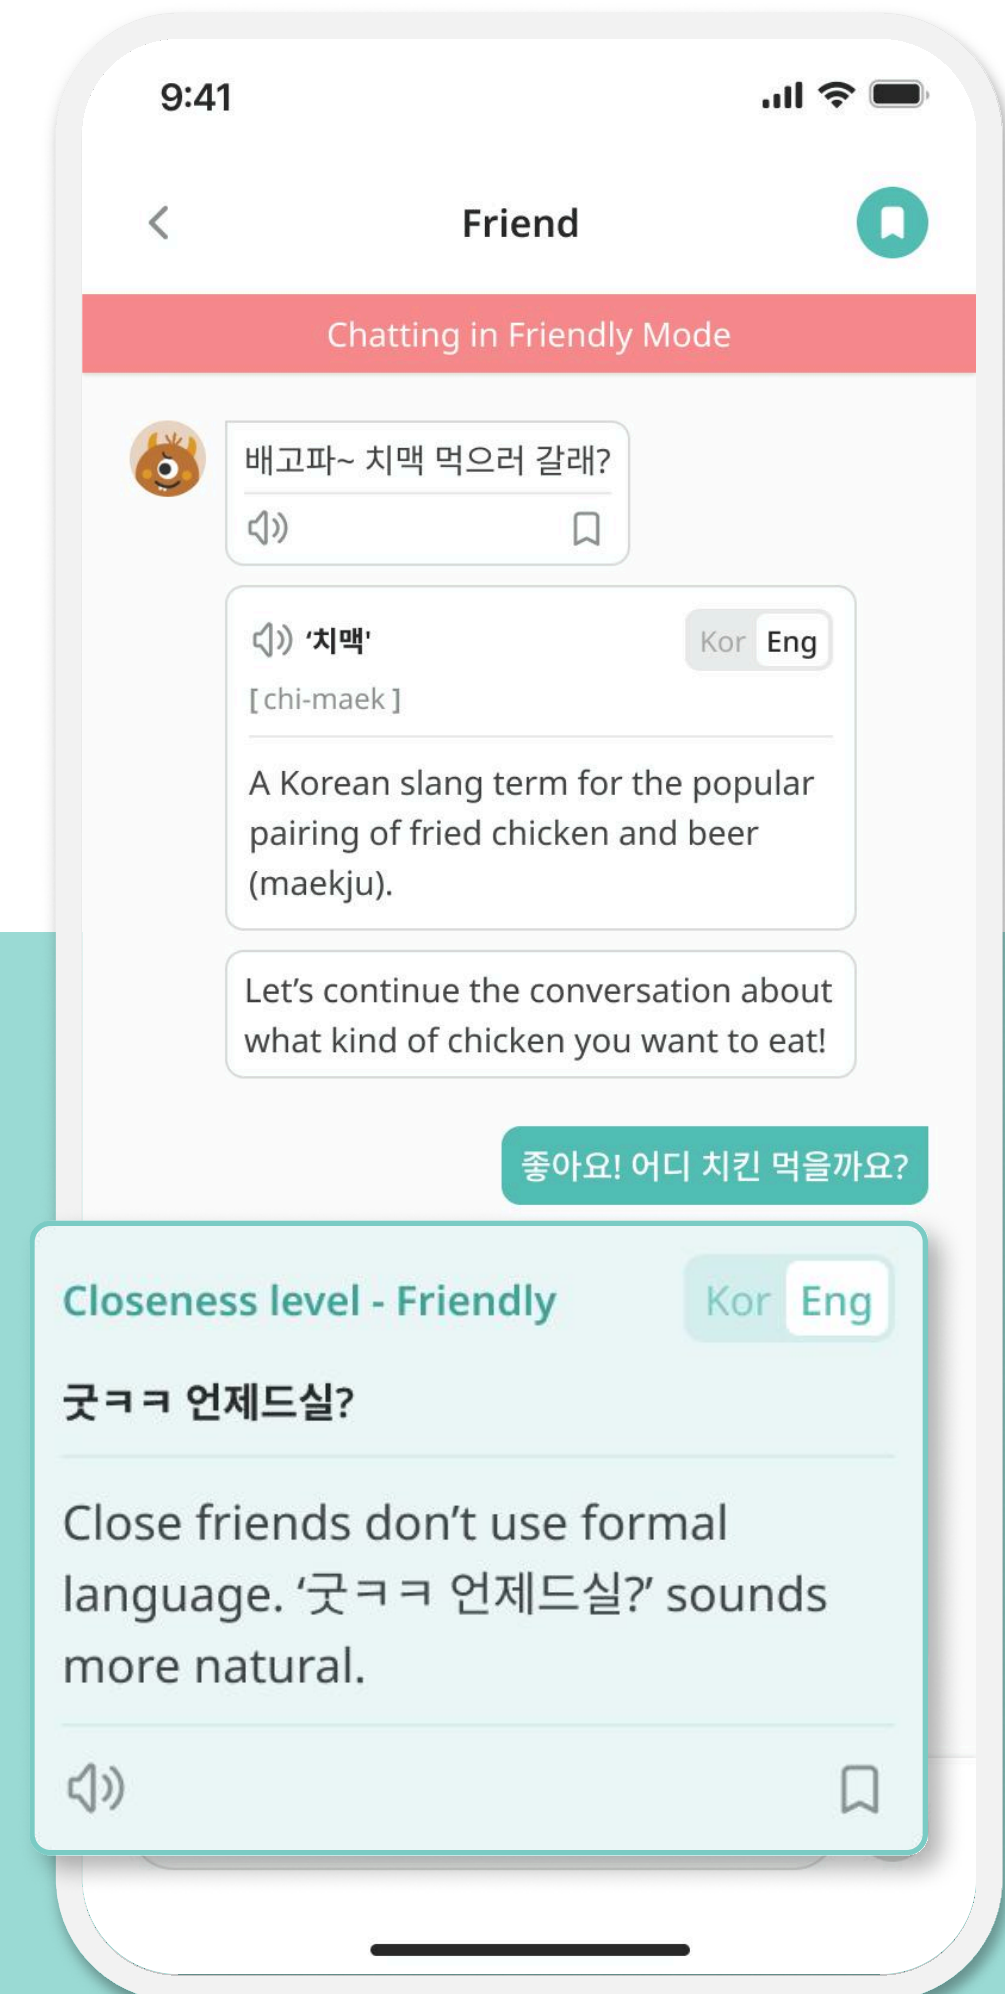

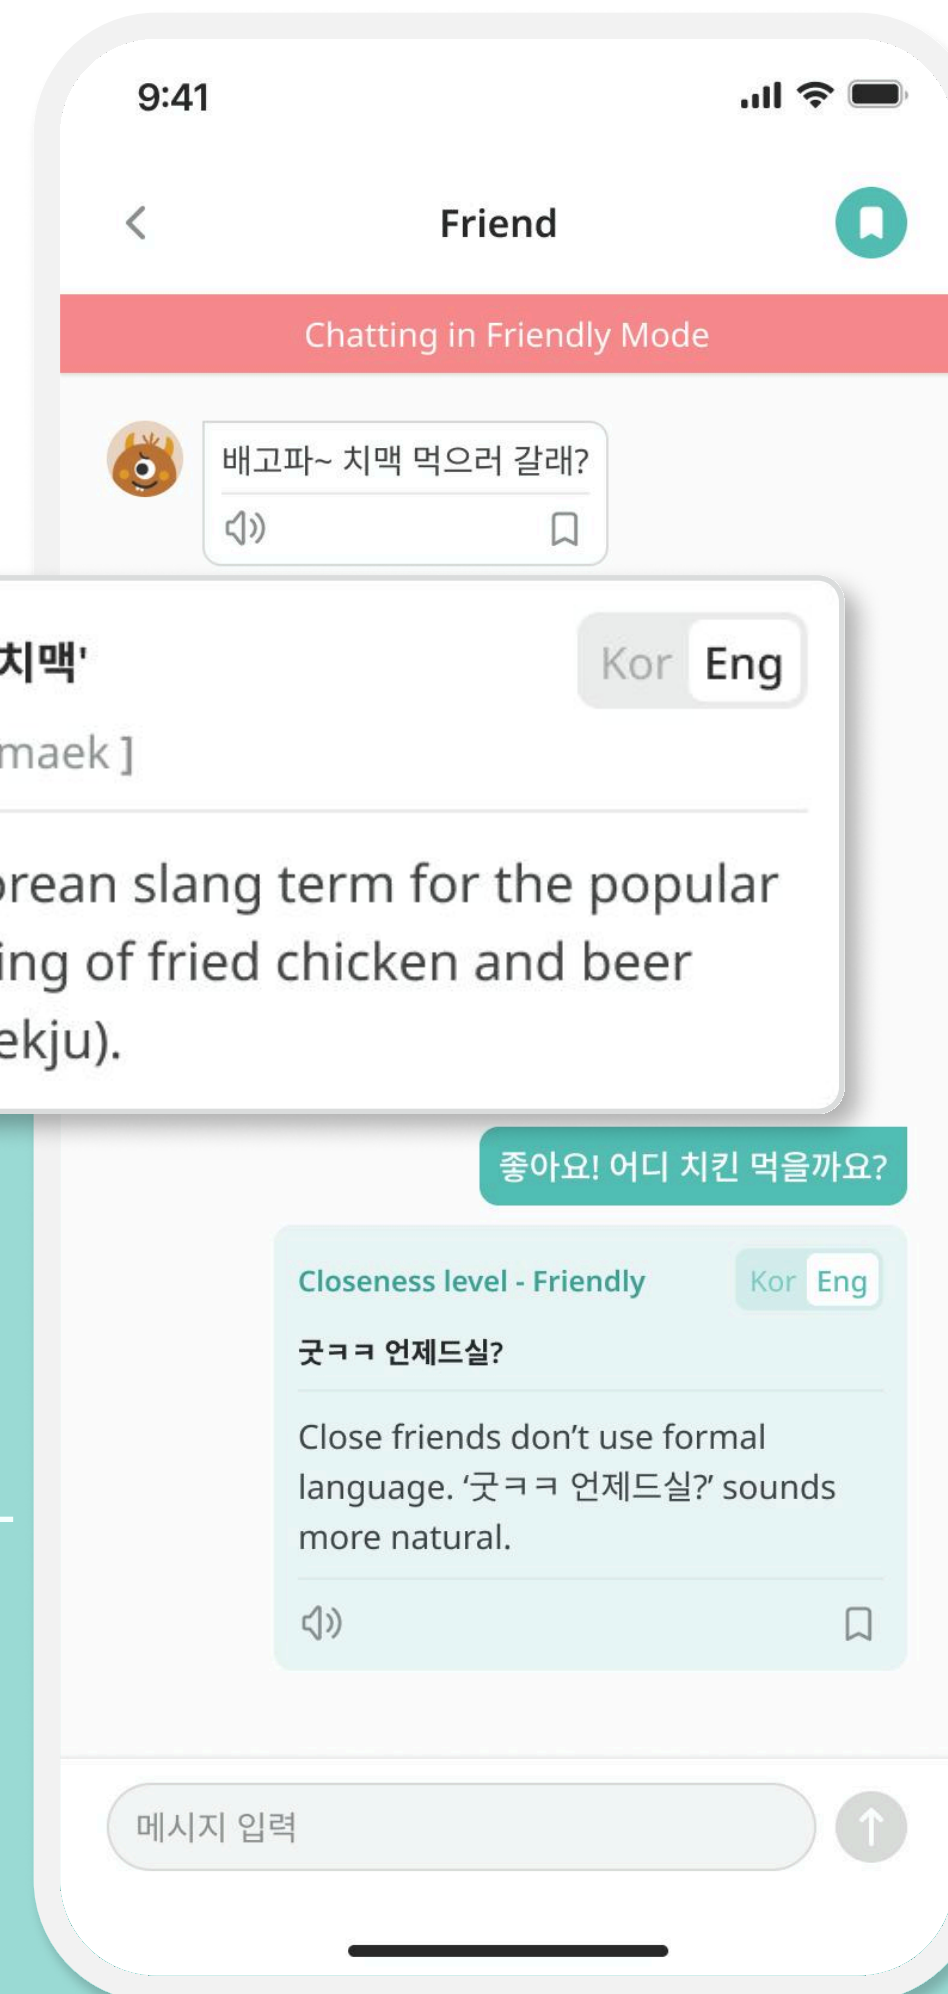

Explanation of new words

🔊 '치맥'
[chi-maek]
A Korean slang term for the popular pairing of fried chicken and beer (maekju).

Correction to a natural expression suited to intimacy

Closeness level - Friendly
꺄꺄꺄 언제드실?
Close friends don't use formal language. '꺄꺄꺄 언제드실?' sounds more natural.

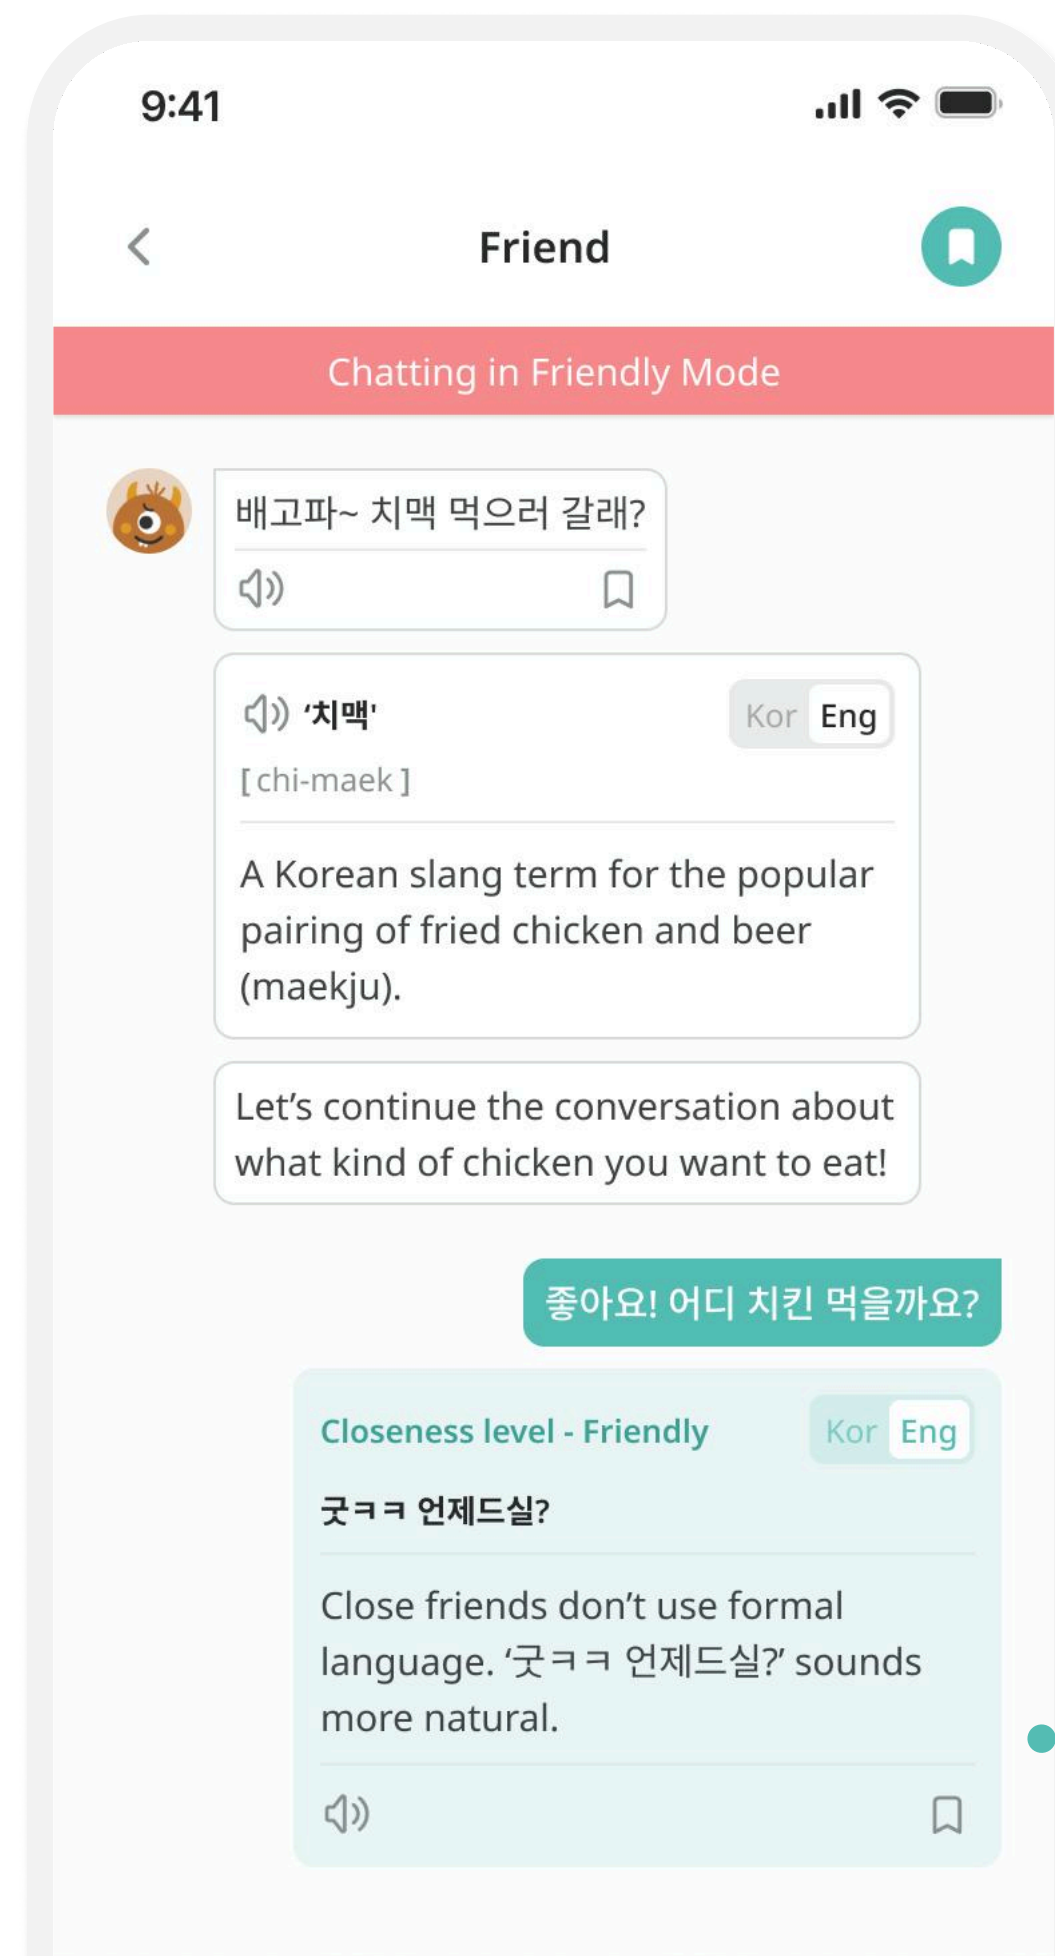

Closeness level - Friendly
꺄꺄꺄 언제드실?
Close friends don't use formal language. '꺄꺄꺄 언제드실?' sounds more natural.

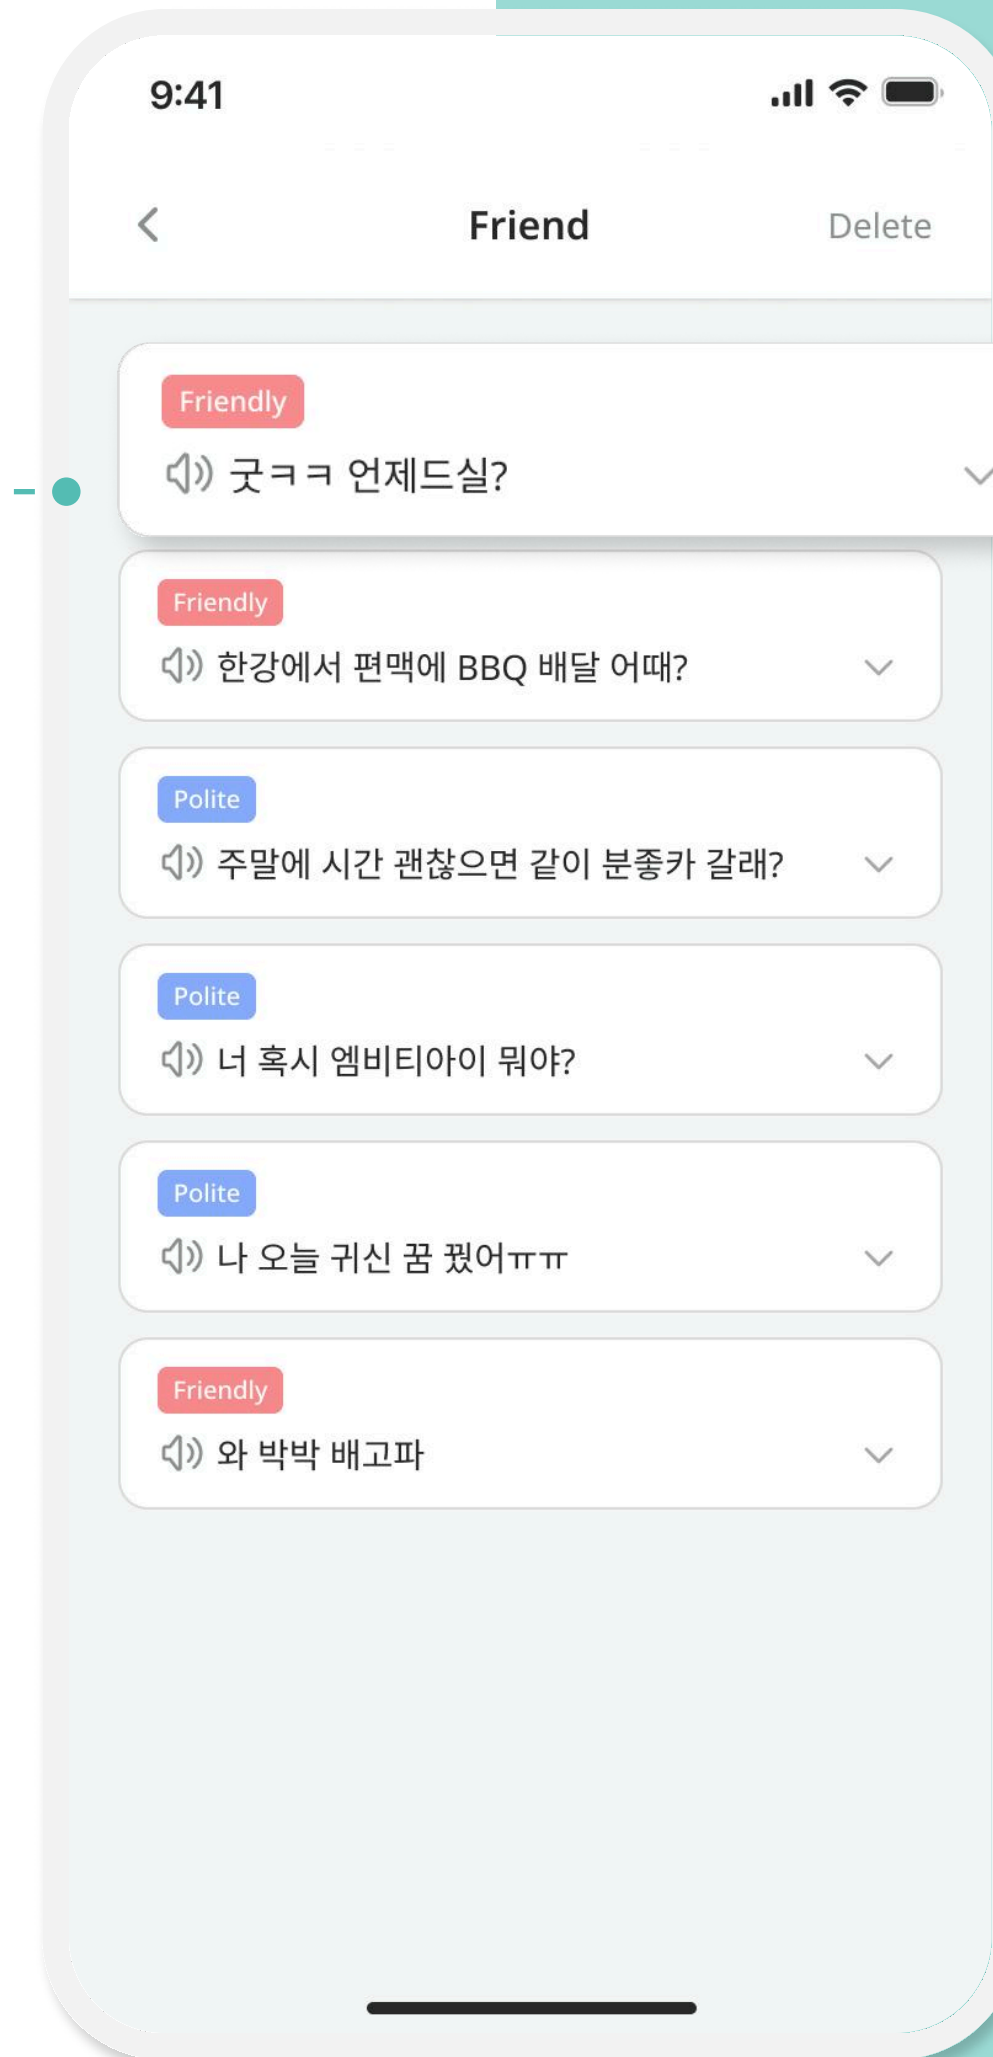

STEP 3 Saved Expressions

Keep what you've learned.

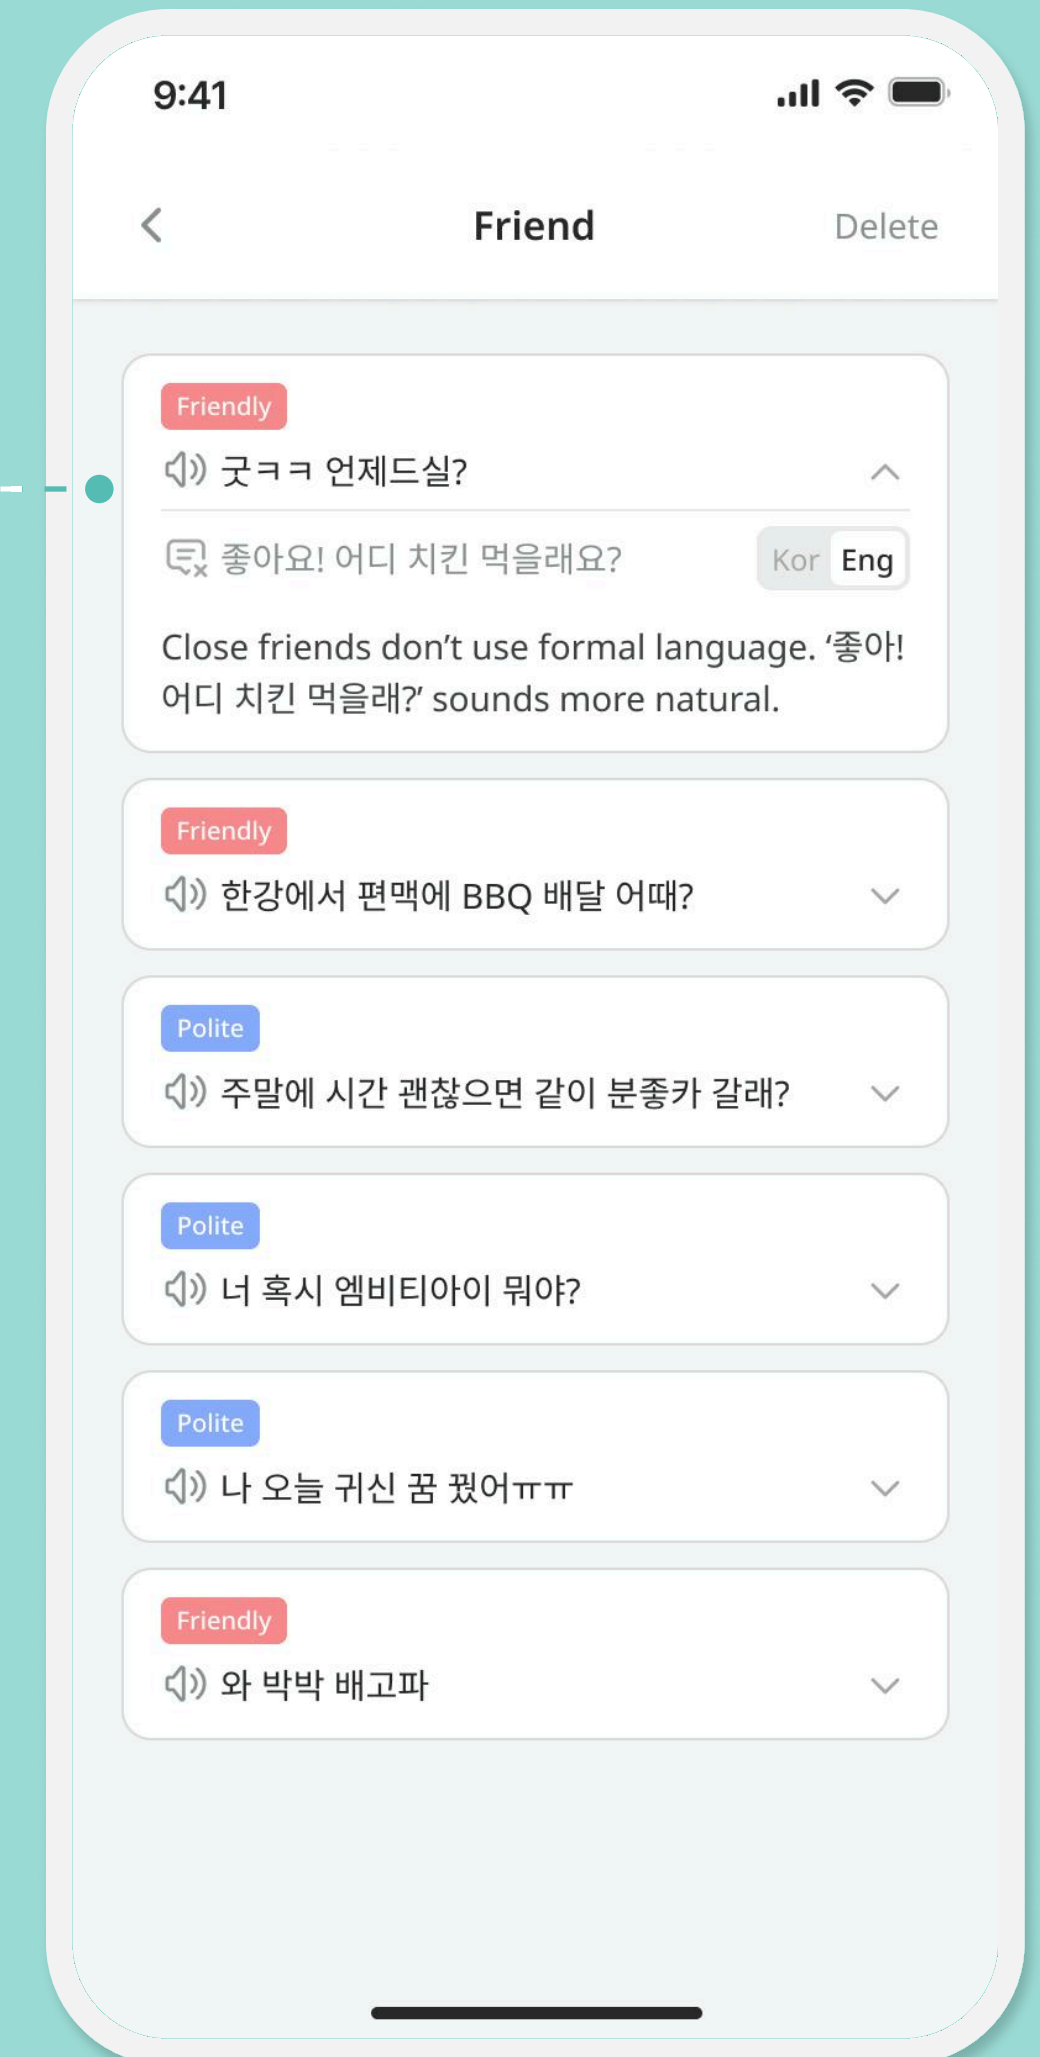

Save corrected phrases to your personal library and review them anytime for continuous learning.

2 Go to archive

1 Expression you want to save Show bookmarks

Time to make your every word natural!
